Modular origami is origami made from several sheets of paper that have been folded into modules, also called units. The modules are usually identically folded but may be of several types. The modules are assembled into models that most often are patterned after the 3D geometric shapes called polyhedra.5/5(1). This book by an expert presents a clear, concise introduction to the special techniques for creating complex polyhedra models. Based on the classic Platonic solids, these 17 projects are appropriate for folders at all levels/5(45).
